TAYLOR CHAIR

Ideally suited for small spaces the incredibly comfortable Taylor stands out with its unique style and design, providing both personality and functionality. The strongly built frame provides the structure supporting gentle internal & external curves resulting in both visual and physical harmony. With care in the design process the Taylor delivers the customers most crucial demand, a comfort that is both supportive and cosy. With tall square tapered timber legs the Taylor maintains a compact, funky demeanour, looking superb in a variety of fabric or leather finishes. This design sits well in both residential and commercial environments.
