

MANTIS CHAIR

The supple, curved and modular bearing provides encompassing support to the body and steel legs that echo the unique angles of the praying mantis - the Mantis swivel chair certainly has its contrasts. The art deco aesthetic delivers an edgy look and feel while offering simple functionality. The clean, angular lines and laser-cut steel foundation highlight aesthetic style while incorporating structural strength. Such striking design does not come at the cost of comfort or usability, with luxurious cushioning the Mantis encourages rest and relaxation.
